EDUCATION

B.Tech in Computer Science and Engineering (IoT)

Swami Keshvanand Institute of Technology, Jaipur

2023 – Present

CGPA: 8.98/10

Senior Secondary (Class XII — Science)

St John's Sr. Sec. School, Kota

2022

83.8%

Secondary (Class X)

St John's Sr. Sec. School, Kota

2020

81.0%

TECHNICAL SKILLS

Languages C, C++, Python, JavaScript, SQL

Web Development HTML, CSS, Bootstrap, Flask, FastAPI

Databases MongoDB, MySQL, PostgreSQL

Tools & Platforms GitHub, VS Code, Docker

Core Skills Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Problem Solving

PROJECTS

Pyoras Dashboard — Vending Machine Management System

A full-stack admin dashboard to manage vending machines, products, inventory, and advertisements.

- Built the backend using **FastAPI** with **PostgreSQL** and async **SQLAlchemy** ORM; used **Alembic** for database migrations and **Docker** multi-stage builds for deployment.
- Implemented separate product catalogs and advertisement management for each machine type — juice, coffee, and sugarcane — with image and video support for juice machines and image-only for coffee machines.
- Built an image conversion pipeline that converts uploaded images to **BMP format (800×480)** for display on **ESP32**-based screens embedded inside coffee machines.
- Included role-based access control, real-time stock monitoring, and sales analytics in the admin panel built with **Next.js 14** and **Tailwind CSS**.

Life Connect — Blood Donor Finder

[GitHub](#)

A web application that connects people in need of blood with nearby donors based on location and blood group.

- Built the backend using **Python Flask** and **MongoDB** to store and manage donor records.
- Added user registration, login authentication, and donor search filtered by city and blood group.
- Designed a simple and responsive UI to make it easy to find and contact donors quickly.

INTERNSHIP EXPERIENCE

Software Developer Intern — Pyoras, Jaipur

May 2026 – Present

Startup building automatic fresh juice vending machines, incubated under **iStart Rajasthan** and backed by **IIT Roorkee**.

- Working on the Pyoras Dashboard — a full-stack system to manage vending machines, products, inventory, and advertisements across multiple locations.
- Developing backend features using **FastAPI**, managing the **PostgreSQL** database, and handling deployment using **Docker**.
- Building the frontend admin panel in **Next.js 14** and implementing advertisement upload flows with media validation for each machine type.

Python Full Stack Intern — Cynbit Technologies, Jaipur

Jun 2025 – Jul 2025

Worked on full-stack web development using Flask and MongoDB.

[View Certificate](#)

- Built backend modules using **Python Flask** with **MongoDB** for data storage and management.
- Implemented CRUD operations, routing, login authentication, and dynamic data handling.
- Worked with Git for version control and followed standard development practices throughout the project.

ACHIEVEMENTS & ACTIVITIES

- Received Semester Topper Certificate in 4th Semester (IoT Branch).
- Volunteered in blood donation camps, which inspired the idea behind the Life Connect project.
- Participated in technical hackathons and collaborative team-based projects.

CERTIFICATIONS

- Oracle AI Foundations Associate [🔗](#)
- Generative AI Fundamentals — Databricks [🔗](#)
- Cyber Job Simulation — Deloitte [🔗](#)
- Summer Internship — Indian Railways (DRM Office Kota) [🔗](#)
