EDUCATION

B.Tech in Computer Science and Engineering (IoT)

Swami Keshvanand Institute of Technology, Jaipur

2023 – Present

CGPA: 8.99/10

Senior Secondary (Class XII — Science)

St John's Sr. Sec. School, Kota

2022

83.8%

Secondary (Class X)

St John's Sr. Sec. School, Kota

2020

81.0%

TECHNICAL SKILLS

Programming Languages C, C++, Python, JavaScript, SQL

Web Technologies HTML, CSS, Flask, FastAPI

Databases MongoDB, MySQL

Cloud & DevOps AWS, Docker

Developer Tools Git/GitHub, VS Code

Core Skills DSA, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

Pyoras Dashboard — Smart Vending Machine Management System

Designed a centralized platform for managing machine data, inventory updates, and advertisement content.

- Developed backend APIs using **FastAPI** to manage vending machines, products, inventory, advertisements, and user operations.
- Implemented secure **JWT-based authentication** and role-based access control for Admin, Manager, Operator, and Sales users.
- Integrated backend services with a **PostgreSQL** database for storing and managing machine, inventory, product, and user information.
- Containerized the backend using **Docker** and participated in deploying the application on **AWS**, contributing to a scalable and reliable deployment workflow.

Life Connect — Blood Donor Finder

[GitHub](#)

Web application that helps users find nearby blood donors based on blood group and location during emergency situations.

- Built the backend using **Python Flask** and **MongoDB** to store and manage donor records.
- Added user registration, login authentication, and donor search filtered by city and blood group.
- Designed a simple and responsive UI to make it easy to find and contact donors quickly.

INTERNSHIP EXPERIENCE

Software Developer Intern — Pyoras, Jaipur

May 2026 – Present

Startup developing smart vending machine solutions, incubated under **iStart Rajasthan** and backed by **IIT Roorkee**.

- Contributing to the Pyoras Dashboard, a platform for managing vending machines, products, inventory, and advertisements.
- Building backend features using **FastAPI** and **PostgreSQL** for machine monitoring, product management, and inventory tracking.
- Worked on a Dockerized backend application deployed on **AWS**, contributing to the development and maintenance of production-ready backend services.

Python Full Stack Intern — Cynbit Technologies, Jaipur

Jun 2025 – Jul 2025

Worked on full-stack web development using Flask and MongoDB.

[View Certificate](#)

- Built backend features using **Python Flask** and **MongoDB** to support application functionality and data management.
- Developed modules for user registration, information management, and efficient data handling across the platform.
- Contributed to enhancing application functionality and ensuring a smooth experience for end users.

ACHIEVEMENTS & ACTIVITIES

- Received Semester Topper Certificate in 4th Semester (IoT Branch).
- Volunteered in blood donation camps, which inspired the idea behind the Life Connect project.
- Participated in technical hackathons and collaborative team-based projects.

CERTIFICATIONS

- Oracle AI Foundations Associate [🔗](#)
- Generative AI Fundamentals — Databricks [🔗](#)
- Cyber Job Simulation — Deloitte [🔗](#)
- Summer Internship — Indian Railways (DRM Office Kota) [🔗](#)
